About Me

A well-disciplined, ambitious, and dedicated professional with experience working in a fast-paced startup environment. Have demonstrated experience for over one year in creating digital designs and self-branding websites. Throughout my career, I have completed various digital marketing products and websites. Have a logical mind with a practical approach to problem-solving and have proven experience working in deadline-driven environments with a drive to see things through to completion. Have served for two years in the Armenian Army forces.

Education

Sep 2017 - Jun 2023 *American University of Armenia* **BS in Computer Science**

Sep 2022 - Feb 2023 *TCO Academy* **Front-End Web Developer**

Experience

MyBrokerSearch Jun 2021-Jun2022

Web Developer

- Developed marketing materials for brokers, real estate agents, insurance agents, and loan agents in the USA, including digital cards, flyers, and videos.
- Collaborated with the design team to create high-quality content such as blog posts, landing pages, brochures, proposals, presentations, emails, and newsletters.
- Designed customizable branding websites for clients and implemented necessary modifications.
- Integrated an IDX software into clients' websites, enabling property search and live website functionality.
- Managed website security and functionality, ensuring regular updates.

Team2B Apr 2023-Present

Web Developer

- Web development with a focus on WordPress and WooCommerce for Armenian companies.
- Experienced in creating custom themes and plugins for WordPress.
- Skilled in frontend development with Vue.js.
- Ensure responsive design and optimize websites for performance and usability.
- Provide ongoing maintenance and support for websites.
